

Frettenham Parish Council

Clerk's Report

PARISH COUNCIL MEETING

8TH JUNE 2026

AGENDA ITEM 9

The Council have been approached again by Finding Fitness Limited, who supplied and installed the climbing wall. They are offering an opportunity to have a fully funded Football Target Trainer installed at the recreation ground. This will be on a similar basis as before, whereby they will prepare all the grant paperwork for Council approval and then submit to The National Lottery Fund. If successful the installation can go ahead. The issue will be space and where you would have it installed. If this can be worked out favourably, I see no reason not to go ahead.

Details provided of this equipment are as follows:

The cost is £7,450 plus VAT. This can be covered by a lottery grant again as we did with the Monkey Challenge.

The structure is the same as your Monkey Challenge. 10m in length, 2m in height. Installation is complete in a day and ready to use. Typically we install eight weeks from date of order.

Please see the image attached.

Target Trainers make playing football and other balls sports fun and engaging whether playing alone or with others. The ball comes back every time, allowing for solo play. Even if there are two children playing football, they get bored of constantly fetching the ball. The Target Trainer allows it to come back each time, keeping children engaged for longer and ultimately more active.
